

Changing dry dog food brands

For a successful diet change, we recommend following the feeding pattern below. The daily feeding volume may be split into two feeds or more, depending upon your dog's requirements and the proportions of Arden Grange increased over the first week as illustrated.

TOP TIPS: For those dogs who do not make eating a priority, here are some additional points:

- Reduce the number of tit-bits given during the introductory period.
- If your dog has been used to eating wet food, moisten the kibble with warm water.

day 1-2	75% original diet 25% Arden Grange
day 3-4	50% original diet 50% Arden Grange
day 5-6	25% original diet 75% Arden Grange
day 7	100% Arden Grange
